FUN WITH CONSTRUCTION™

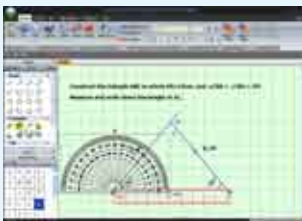

Enrich Learning with Fun With Construction™

Designed to enrich learning, Fun With Construction™ (FWC) empowers users with digitized tools to enable creative representations of lessons and student learnings.

FWC, Gold winner of the HP-INIT Award, continues to be a popular choice among educators for its engaging effect in the classroom and enhancing student motivation towards learning.

The HP-INIT Award (Hewlett-Packard Innovation in Technology Singapore) recognizes good practices of teachers who collaborate and network among themselves with other educators in the innovative use of IT for teaching and learning.

Suitable for all subjects including Mathematics, Geography and Topography.

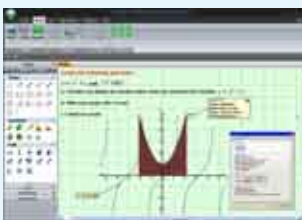

Digitized Construction Tools

Hassle-free shape and angle constructions through digitized tools such as protractor, ruler, compass and more – also often used for modeling, map-reading and contour plotting.

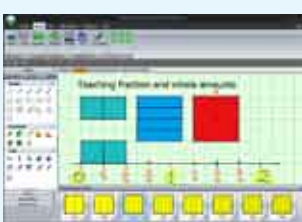

Lesson Planning Tools

FWC's layering and playback features enable fun, engaging presentations of students' learnings and teachers' representation of concepts – empowering students with a better grasp of conceptual logic to develop critical thinking skills.

Graphing Tools

Equipped with a comprehensive graphing calculator, symbol and formula dictionary, FWC enables plotting and design of graphs that can be generated manually or automatically.

Slicing Tools

A popular feature used in K12 classes, FWC's shape cutter offers an engaging avenue for students to learn about fractions and shape construction.

Engage students with Fun With Construction™ to develop their critical analysis and thinking skills!

Learn Anytime, Anywhere with HeuCampus®

Based on a patented role-based instant messaging platform, HeuCampus is designed to facilitate real-time classroom management with control and observation capabilities to monitor students' progress – often used to optimize online and offline group collaborations and stimulate independent learning through peer-to-peer sharing.

Developed with a combination of administrative, teaching and learning features, institutions can choose to adopt HeuCampus® as a stand-alone facility or integrate HeuCampus® to their existing learning system.

Singapore Management University

Dr. Themin, Associate Dean, Curriculum and Teaching

"SMU is committed to an interactive, participative and technologically-enabled learning experience. To that end, we are always looking out for innovations through which we could strategically apply technology with the goal of delivering the best possible learning experience for our students. SMU is proud to be working with Heulab in the development of its virtual learning community software. Feedback from students have been very positive and we look forward to rolling it out to the whole university."

Crescent Girls' School

Mrs. Lee Bee Yann, Former Principal

"Our teachers and students are saying that lessons are more engaging and fun. The teachers are excited with the availability of innovative tools to take teaching and learning to a new dimension, including learning beyond the boundaries of the traditional classroom and empowering students to create knowledge through personalized learning."

Catholic High School

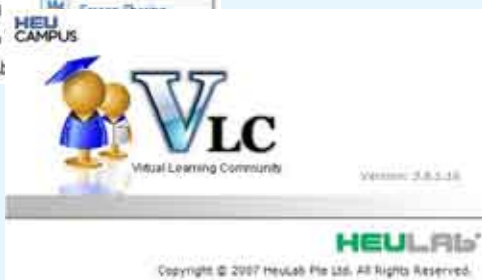

Mrs. Oh Wee Ming, Head of Department IT

"(HeuCampus) allows us to gain control and monitor the progress of the students easily with a click of a button. It enables and facilitates sharing among students and between students and teachers. Students may send questions or request support from teachers through the application. Teachers are also able to send questions to students to acquire feedback on their understanding of the concepts taught and provide instant clarification or reinforcement of the concepts."

Stimulate peer-to-peer sharing within your entire community with real-time collaborative tools for private, public and class groups through HeuCampus.

Equipped with real-time communication and group management tools, HeuCampus enables instant sharing of digital resources and role-playing opportunities to enhance peer-to-peer interactions via interactive whiteboard, chat, desktop sharing, and more.

Progress & Performance Tracking

Designed with a flexible class layout view that can be customized according to your physical classroom layout, HeuCampus equips teachers with the necessary tools to monitor students' progress in class and performance – complemented with real-time quizzing features to acquire instant feedback on students' understanding of concepts being taught in class!

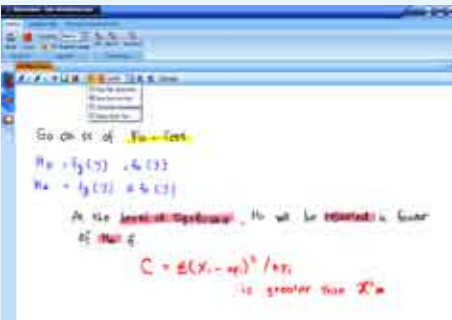

Class Management Tools

Instant feedback on applications and websites running on your students' computers – complemented with control features so you know if they're paying attention!

Assessment Engine

Conduct online or offline exam-friendly assessments with HeuCampus – equipped with a repository of packaged assessments stored within a Question Bank so assessments stay relevant to students' needs today and tomorrow. Educators can even bookmark and share model responses from students!

Group Collaboration

Stimulate peer-to-peer interaction and offer collaborative opportunities with HeuCampus' group management tools to establish your institution as a living, growing learning community.

Peer Review

Use HeuCampus' Peer Review system to help students learn better by understanding each other and of their own learning behaviour.

Transform live moments into a multimedia learning experience !

Designed as a lightweight desktop recorder, Live Record makes creating your own videos and learning content easy so you can capture on-screen activities, with audio and webcam tools and share video files with your students!

There's nothing like personalized visual and audio videos to engage and help students learn. You can use Live Record to create your own instructional videos to explain complicated concepts and share it with your students – or simply capture a live streaming video you can use to present in class with less fuss.

Allow your students to exercise self-directed learning and review learning materials at their own pace. With Playback function they have the control to start, pause, skip and replay the recorded learning materials – anytime, anywhere they like.

Start capturing live moments with Live Record and bring life into learning today!

Transform any flat surface into an interactive screen !

Imagine turning your entire classroom into a virtual interactive space all with just a hüe pen.

hüe is an integrated hardware and software solution that you can use to create a virtual interactive screen with a pen that works exactly like a mouse, and a free-positioning Wii-mote so you can turn a whiteboard, table, floor, wall or any other flat surface into an interactive screen!

Easy to use and setup, hüe also empowers you with digital and inking tools to navigate seamlessly between your computer documents and interactive presentation – so you can capture, save and share them with your class.

With hüe, teachers are able to better e-illustrate ideas and deliver lessons in a more interesting manner. Such flexibility together with hands-on interaction on hüe further engages and promotes learning's enthusiasm for students.

Be it in a big classroom setting or a small group discussion environment, hüe is definitely your excellent demonstration tool!

FUN WITH MINDBOOK™

Foster Independent Learning with Fun With MindBook™

Designed as a brainstorming tool and personal note-taking tool, Fun With MindBook™ (FMB) serves as a platform for teachers and students to consolidate their personal reflections on what they have learned from each other.

FMB enriches learning through creative representations of inter-related concepts with its rich media library, enabling graphical illustration of concepts – helps students identify their personal thought and learning behaviour to foster independent learning.

Suitable for all subjects and as a personal journal or e-portfolio.

D-Book

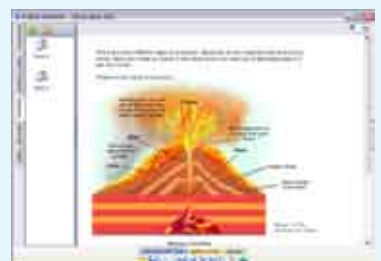

Personalize Learning with D-Book™

Designed to package digital content into a single resource, D-Book digitizes textbooks that can be integrated with rich media content including videos, flash animations and hyperlink references to complement and reinforce learnings.

Equipped with digital inking utilities and user-friendly page navigation features, D-Book combines intuitive behavior and interactive capabilities to motivate learning beyond the classroom!

A popular choice among teachers for its authoring capabilities and in-built lesson sequencer coupled with an interactive whiteboard.

Suitable for all subjects.
